Telecommunication Engineering graduate with hands-on experience as a **Network Engineer**, managing F5 BIG-IP infrastructure for business-critical banking systems. A **fast, adaptive learner** who **communicates well** and stays **effective under pressure**, even while **multitasking** across competing priorities. Actively growing into **AI Engineering**, drawn to applying the same **problem-solving mindset** to **machine learning** and **LLM-based** projects. Strong **leadership** and **teamwork** background, built through roles as Vice President of a student association and former head of advanced education for a nature enthusiasts' club. Eager to bring this mix of technical **reliability**, **adaptability**, and **AI interest** to impactful technology projects.

EXPERIENCE

PT Mastersystem Infotama Tbk.

2025 – 2026

Network Engineer F5 – PT Bank Mandiri Tbk Project (October 2025 – Present)

- Configured and maintained F5 BIG-IP LTM & GTM infrastructure (Virtual Servers, Pools, DNS) ensuring high availability for business-critical banking applications at PT. Bank Mandiri.
- Developed a Python automation script for recurring operational tasks, reducing manual execution time from 45 minutes to 5 minutes — an 89% efficiency gain.
- Orchestrated DNS traffic swing operations and managed planned application switchovers with minimal service disruption.
- Renewed SSL/TLS certificates across production endpoints and diagnosed availability incidents by analyzing F5 health monitor outputs.
- Performed rolling pool member lifecycle management (enable/disable) to support zero-downtime deployments.

Himpunan Mahasiswa Teknik Telekomunikasi

2023 – 2025

Vice President (September 2024 – January 2025)

- Supervised and coordinated activities of the Ministry of Science and Student Development and the Ministry of External Affairs
- Supervised 5 departments and ensured smooth operations among 60 members.
- Facilitated collaboration between ministries and departments to drive impactful projects.
- Monitor progress and performance of ministry initiatives and projects
- Maintain readiness to lead the association in emergency situations or when the President is unavailable

Senior Staff of Public Relations Department (April 2023 – September 2024)

- Coordinator of Monthly Talk show event with the Alumni of Telecommunication Engineering to sharing experience or knowledge about them.
- Leading a “Telco Thanksgiving” Event to appreciate external organization for keep supporting our event and programs.

Junior Staff of Public Relations Department (February – March 2023)

- Moderating one of the Public Relation events, "Telcotalks," on Live Instagram for HMTT, I ensure smooth operations and engaging discussions.

Cybersecurity, Multimedia and Big Data Laboratory

2022 – 2025

Head of Public Relation Division (August 2024 – January 2025)

- Establishing media partnerships with organizations outside the campus.
- Acting as a liaison between the internal laboratory and external parties.
- Led branding initiatives to enhance the lab's public image and visibility.

Research Assistant of Big Data Division (December 2022 – January 2025)

- Developed an unsupervised machine learning model for water quality analysis using KMeans clustering (scikit-learn) on real-world IoT sensor data, achieving a Silhouette Score of 0.282 and Davies-Bouldin Index (DBI) of 1.140. Determined the optimal number of clusters using the Elbow Method with Yellowbrick's KelbowVisualizer.
- Collected review data from IMDb for a film series using web scraping techniques: Selenium for dynamic page interaction and BeautifulSoup for HTML parsing. Successfully scraped and structured over 1000 reviews.

- Performed sentiment analysis on IMDb review data using BERT pre-trained model (transformers), achieving 92% accuracy. Earlier iterations using NLTK + scikit-learn provided insight into text preprocessing and baseline modeling before adopting a transformer-based approach.
- Participating on Kaggle competition 'Spaceship Titanic'.
- Participating on JOINTS DATA COMPETITION on 17th April 2023.
- Participating on COMPFEST Data Analytics Dash on 3 September 2023

Perhimpunan Penjelajah Alam Jamadagni

2021 – 2024

Head of DIKLAT 47 at DP 2023 (February 2023 - April 2024)

- Creating a plan for the development of young members.
- Ensuring the attainment of values instilled in young members.
- As the highest authority, making the decision to appoint young members as full members.

Head of Secretariat and Logistic Division at DP 2022-2023 (June 2022 - January 2023)

- Recording all the equipment owned by the Organization.
- Managing all borrowed equipment and equipment borrowings.
- Organizing a monthly office cleaning activity in secretariat

Field Coordinator of Mt.Sindoro Expedition DIKLAT 43 (September 2021)

- Keeping the event on track from the preparation.
- Making decisions from any problem on the field.
- Ensure the safety of all young staff 43 Jamadagni.

EDUCATION

Telkom University, Bandung

2021 - 2025

Bachelor's degree in Telecommunication Engineering, In-Major GPA: 3.44 / 4.00

Thesis: The influence of water quality with Temperature, pH, and Turbidity parameters on catfish growth in Bandung Techno Park Pond using Machine Learning methods

SMAN 3 Bandung

2018 - 2021

PROJECT

[WhatsApp AI Personal Assistant](#) — *Python · Flask · Groq (LLaMA 3.1) · Gemini Flash · Gemini Embedding · SQLite · Docker · Green API*

Self-hosted bot with a two-stage **AI pipeline**: fast **intent classifier** (26 intents) routes to modules, **Gemini** handles **fallback/creative tasks**. **RAG-style semantic memory** using **vector embeddings** in **SQLite**, bilingual support, full **Google Calendar/Tasks/Sheets integration** via **webhook architecture**.

[Innovillage 2023 "GoatGuard"](#) — *Python · ML · IoT Sensors*

Achieved recognition as a **Top 163 Team** and **secured funding** in the Innovillage 2023 competition for "GoatGuard.", we create an **IoT-based device** integrated with **machine learning** to early detect diseases in goats. We aimed to monitor the goat's temperature, heart rate, and oxygen saturation, and then analyze the possible diseases that might occur if any of these parameters are abnormal.

[MyIpond: A Water Quality Monitoring System for Catfish Ponds](#) — *Python · scikit-learn · IoT Sensors · Firebase RTDB · Machine Learning*

MyIpond is a water quality monitoring system designed for catfish ponds, measuring key parameters such as temperature, turbidity, and pH with the **IoT-Sensors**. The system integrates **machine learning** to analyze the impact of water conditions on catfish health and growth, enabling better pond management and productivity.

[Sentiment Analysis on IMDb Reviews](#) — *Python · NLTK · BeautifulSoup · Selenium · scikit-learn · Transformers (BERT)*

Scraped 1,000+ film series reviews from IMDb using **Selenium** and **BeautifulSoup**. Progressed from **NLTK** baseline to a **BERT** fine-tuned model, achieving **92% classification accuracy**. Identified audience sentiment trends and patterns across review datasets.
